

**Job Title:** Senior Project Engineer

**Department:** Electrical – Bakery/Industrial

**Location:** Office Based. Must be willing to work on site/and or abroad if required.

CJ Connally's are currently recruiting for a Senior Project Engineer to join their specialist bakery team. Commercially aware you will look to development business, prepare quotations for work and plan/project manage electrical engineering work through to completion. **You will need to have previous experience with installations within a bakery environment** along with excellent business acumen in order to meet clients and retain existing successful partnerships. Ideally you will have an existing portfolio of contacts and be able to develop these into new business projects for CJ Connally. You will be office based but expected to work on site or abroad if required, managing other electricians and subcontractors where necessary. You will have a full appreciation of health and safety requirements, but also know the standards required for hygiene working in a food environment.

### **Responsibilities**

- Work within a multi-disciplinary project team to identify customer needs.
- Design appropriate systems and products, reading design specifications and technical drawings.
- Research suitable solutions and estimate costs and timescales using appropriate software.
- Set out jobs from drawings/specifications and requisition the necessary installation materials.
- Manage all necessary installation, commissioning and supporting documentation.
- Work to British, European and other standards as required.
- Communicate effectively with clients, contractors and subcontractors to ensure projects are completed to specific timescales and costs.
- Attend meetings on site and complete on-site Risk Assessments and Method Statements if required.
- Attend client functions and networking events to promote further business where appropriate.
- Effective Management of client accounts, develop repeat business and ensure customer satisfaction.

### **Personal Specification**

- Experience in Industrial bakery markets/organisations.
- Be commercially aware and able to follow up business leads effectively and quickly.
- Be able to communicate effectively at all levels via phone, email, face to face or in writing.
- Be of an adequate level of physical fitness for the tasks required by the role.
- Be able to work within a multi-disciplined projects team, communicating clearly in order to satisfy common project/organisational goals.
- Be prepared to work in a flexible manner to fulfil the needs of the business.
- Be able to work to deadlines and manage your own time effectively.
- Is solution driven with a positive approach to problem solving.
- Have a logical approach to planning work and preparing schedules.
- Be approachable and have a friendly disposition, able to work in a team but equally well alone.
- Be self-motivated and have a corporate interest/outlook, setting an example to others.

### **Essential Qualifications/Skills Required**

- Hold a valid, appropriate UK driving licence.
- IT literate, competent with all Microsoft Office applications.
- Possess excellent planning and organisational skills to aid time and resource allocation.
- Have undergone an Apprenticeship or equivalent training and had practical training in electrical installation work.
- Hold Level 3 NVQ Electrotechnical Services qualification or equivalent.

- Hold Level 3 Certificate of Electrical Installations (inspection, testing and certification of electrical installations) or equivalent. 17<sup>th</sup> Edition IEE Wiring Regulations.
  - Have thorough working knowledge of the National Working Rules for the Electrical Contracting Industry, the current IET Wiring Regulations BS7671 and Construction Industry Safety Regulations.
  - Have knowledge of the most economical and effective layout of electrical installations.
  - Demonstrate competence in Inspection & Testing; City & Guilds 2391 or equivalent.
  - Have proven supervisory skills in order to support the field engineers with their requirements to complete projects.
- 

#### **Desirable Qualifications/Skills Required**

- Experience with Construction Manager and EES data electrical estimating software inc. Amtech software
- Experience in design/installation of control panels and motor drives.
- Experience using AUTOCAD software.
- Experience in implementing or using other Management software such as PDA's or Real Time work flow systems.
- IOSH Health and Safety qualifications.
- City & Guilds 2400 Design, Erection & Verification of electrical Installation Level 4 or equivalent
- Project Management qualification.
